

How to use this interactive concept map of intelligent design

This concept map based dialogue attempts to layout in relatively comprehensive fashion the (not quite irreducibly!) complex issues and relationships underlying various aspects of ‘Intelligent Design.’ To access various linked resources, simply click the icons under concept boxes then select resources from the drop-down lists. For example, in the Wedge Strategy oval, click the middle icon and then click “Wedge Document pdf” to open the document. By the way, this piece should be required reading for anyone wondering about Intelligent Design. The Roman numerals indicate a suggested sequence of topics but you should follow whatever path seems most relevant to your own interests.

Note that I am willing to present versions of this dialogue to groups and that the focus of my talk can be adapted to a variety of contexts. Direct inquiries or comments to dsiems@bemidjistate.edu.

For an even more comprehensive and rigorous analysis see: Forrest, B. and Gross, P.R. 2004. Creationism’s Trojan Horse: the Wedge of Intelligent Design. Oxford University Press.
